Background

- Mr. Hardy has over 25 years experience and is a Registered Professional Engineer (Chemical Engineering) and Certified Industrial Hygienist. He has managed a number of projects involving chemical processing and environmental issues for the demilitarization of chemical munitions. He is currently working at the Tengiz, Kazakhstan oil field. Before returning to Hawaii Mr. Hardy spent 7 years on Johnston Island as an Environmental Process Engineer. As such he was responsible maintaining the facility's compliance with all applicable federal regulations including RCRA and OSHA standards. Prior to working on Johnston Island, he was a consulting Engineer for Battelle Labs and the NASA Lewis Research Center (LeRC). He was responsible for government liaison, union interface, project management, quality maintenance, technical reporting, and environmental compliance.
